TRAINING COURSE INFORMATION

NEBOSH NATIONAL
CERTIFICATE IN
CONSTRUCTION
HEALTH AND SAFETY

nebosh

Accredited Centre

1097

welcome

Thank you for enquiring about the NEBOSH National Certificate in Construction Health and Safety Course at the NEC. The purpose of this booklet is to provide you with all of the information you require to make a decision about your NEBOSH training requirements.

If you have any further questions or concerns, please do not hesitate to get in touch with us.

the nebosh national certificate in construction health and safety

BECAUSE IN CONSTRUCTION, YOU NEED TO KNOW WHAT HEALTH AND SAFETY IS ALL ABOUT.

WHAT KIND OF PEOPLE TAKE THE NEBOSH NATIONAL CERTIFICATE IN CONSTRUCTION HEALTH AND SAFETY?

People working in construction, civil engineering, utilities, facilities, broadcasting, events & exhibitions, property management and more. People who are managers, supervisors and those responsible for managing health and safety risks. People who need the right level of skills and know-how to fulfil their health and safety responsibilities.

WHAT WILL I GAIN FROM THIS QUALIFICATION?

Knowledge – Whether health and safety is your main responsibility, or just a part of what you do, the NEBOSH National Certificate in Construction Health and Safety will give you vital knowledge to help you perform better in your role.

Enjoyment – You'll enjoy taking the NEBOSH National Certificate in Construction Health and Safety. You'll discover skills and techniques that are really useful and practical, not just theoretical.

Recognition – NEBOSH is highly regarded in the construction industry. Our qualifications are what employers seek when it comes to health and safety. The NEBOSH Certificate in Construction is supported

by the construction industry Sector Skills Council (SSC) ConstructionSkills.

Our National Certificate in Construction Health and Safety is also accepted by IOSH (Institution of Occupational Safety and Health) to meet the academic requirements for Technical Membership of IOSH (Tech IOSH), and the Association for Project Safety (APS) for Construction Safety Associate Membership (AaPS).

Career development – For some, this Certificate can be a first step towards a career in health and safety. For others, it forms part of an important set of qualifications which brings them success and advancement in their chosen field.

WHAT WILL MY EMPLOYER GAIN FROM THIS QUALIFICATION?

A safer workplace – Construction work can be very dangerous. Done properly, health and safety protects people from injury and loss of life.

People with the NEBOSH National Certificate in Construction Health and Safety know how to help employers avoid prosecution, litigation, absence costs and loss of reputation.

Competence – An employer whose staff are NEBOSH qualified is an employer committed to health and safety. The NEBOSH National Certificate in Construction Health and Safety demonstrates competence, which can help employers meet recognised standards, codes of practice and even win new business.

Return on investment – An employee with a NEBOSH

'With construction workers remaining the most vulnerable to major injury at work along with the high level of risks to those who need to maintain and alter buildings / structures, the NEBOSH Construction Certificate offers a sound benchmark level for all duty holders to demonstrate stage 1 competence.

Theoretical and practical application within the syllabus to manage both health and safety from planning, design and construction to use and demolition, ensures those awarded with the certificate are well capable to meet challenges to make a difference'

John Lacey, Former President and Chairman of IOSH Construction Group CFIOSH, HFAPS, FSIA, MASSE

National Certificate in Construction Health and Safety has a practical set of skills that brings real value to the modern construction site and other places of work.

ARE YOU ALREADY ONE STEP TOWARDS YOUR NEXT NEBOSH CERTIFICATE?

Unit NGC1 of this qualification (Management of health and safety) is common to the National Certificate in Construction, the National General Certificate and the Certificate in Fire Safety and Risk Management. You do not need to sit Unit NGC1 again if you have already passed it within the last five years.

WHAT DOES THE COURSE COVER?

It covers a broad range of construction hazards and how to control them, as well as the key legal requirements. Crucially, the practical element of the course also ensures that participants can carry out, unaided, a safety inspection of a construction workplace and prepare an appropriate report.

HOW IS THE COURSE ASSESSED?

Candidates are assessed with written examinations for each of the two taught units and a practical assessment. A unit certificate is issued denoting successful achievement of each unit. A certificate parchment is issued on completion of the two units

the course venue

BACKGROUND

With 20 interconnecting halls, at the heart of the UK's transport network, the NEC continues to be a conference and exhibition venue of today, and of the future. We stage around 140 trade and consumer events each year, ranging from world-famous public shows such as Crufts and Clothes Show Live, to huge international trade exhibitions like IFSEC and Spring Fair, Birmingham.

HISTORY

It was 1976, the visionaries behind the NEC might have made a fashion faux pas with their flared suits and big hair, but they got their vision for the NEC of the future spot on.

Since the official opening of the NEC, the venue has built upon its early successes and now welcomes more than two million people every year.

travel directions and location

THE NEC IS EASY TO FIND

Key

- P1/P2** Piazza entrances
- A1/A2/A3** Atrium entrances
- i** Visitor & Business Centre - T: +44 (0)121 780 4141

the national construction certificate syllabus

The national construction certificate consists of two taught units NGC1, NCC1 and a practical unit NCC2:

Units NGC1 and NCC1 are taught units each assessed by a two-hour written examination

Unit NCC2 is assessed by a two-hour practical examination carried out in a 'Live' environment at the NEC or in candidates own workplace to test the application of taught health and safety principles in a construction workplace. The assessment must normally be taken within 14 days of a written examination.

the duration of the course

You should plan your study around a minimum of 105 taught hours and approximately 52 hours of private study and background reading.

NGC1	5 DAYS
NCC1	5 DAYS

As part of the course we provide you with text books and pens.

the course tutors and invigilators

Paul Knight

Pauls' background is in operational risk management as a risk consultant in the insurance industry. He spent several years as a Principal Consultant for Aviva Risk Management Solutions before setting up his own consultancy company. Paul is an experienced IOSH/NEBOSH tutor.

He has also developed and managed the delivery of many courses, some of which have been accredited by IOSH and CIWM. Paul also delivers health and safety and fire safety training and consultancy services. These include audits, policy/system development and risk assessments including fire.

Paul is a Chartered Member of the Institute of Occupational Health and Safety, a Member of the Institute of Risk Management and a Graduate Member of the Institute of Fire Engineers. He has worked with many large national organisations across a diverse range of industries including construction, utilities, health & social care, publishing and retail.

Paul is passionate about his profession. He sees health and safety as a reason to take calculated risks and seize opportunities rather than obstruct business goals. He hopes that this is evident in his approach to both training and consultancy. He is very proud to be associated with the NEC Group and Oncourse.
